You are about to purchase a product that is not simple and may be difficult to understand.

## What is this product?

**Type** The Fund is an open-ended investment company organised as a "société anonyme" under the laws of the Grand Duchy of Luxembourg and qualifies as a Société d'Investissement à Capital Variable ("SICAV").

**Term** The Fund has no maturity date and can only be terminated by the shareholders themselves. Liquidation may be effected by resolution of a General Meeting of Shareholders. If the Fund is dissolved, a liquidator will proceed with the liquidation. The proceeds of the liquidation will be distributed to shareholders in proportion to their shares.

## Objectives

**Product objectives** The investment objective of the sub-fund is long term (> 5 years) capital appreciation by investing in global equity markets including emerging markets with a distinct focus in diversified holding companies and private equity, while promoting environmental or social characteristics.

**Investment approach** The sub-fund invests in listed diversified holding companies, listed private equity managers, in Funds exposed to private debt in their portfolio and in listed business development companies (which invest at least 70% of its assets in nonpublic US companies with market value of less than \$ 250M). The sub-fund may also invests in other mutual Funds and ETF's.

**Investment policy** The sub-fund may invest more than 10% of its net assets in UCITS and other UCIs, in accordance with the investment restrictions detailed in the Fund prospectus.

**Benchmark** The sub-fund is actively managed and uses a combination of 50% iShares MSCI World UCITS ETF and 50% iShares Listed Private Equity UCITS ETF (the "Benchmark") for performance measurement purposes only. The sub-fund is therefore not constrained in any way by the Benchmark.

**Redemption policy** Each investor may apply for the redemption of all or part of his shares or of a fixed amount as of each valuation day at the net asset value per share determined as of such valuation day. If the value of a shareholder's holding on the relevant valuation day is less than the specified minimum holding amount, the shareholder will be deemed to have requested the redemption of all of his shares.

**Distribution policy** Accumulation units do not distribute a dividend (CAP). The annual result is capitalized (or reinvested). Distribution units pay an annual dividend (DIV), insofar as the results of the Fund allow this.

**Exchange policy** You have the right to exchange your units for units of another sub-fund of the Fund. You will find any costs for this in the section 'costs'. Further information can be obtained in the prospectus via [www.cadelux.lu](http://www.cadelux.lu)

**Asset segregation** The Fund is structured by having segregated assets and liabilities between its sub-funds. As a consequence, the rights of investors in relation to any one sub-fund are restricted to the assets of that sub-fund.

**SFDR** The sub-fund promotes, among other things, environmental or social characteristics (or a combination of these characteristics) as described in article 8 of the SFDR.

**Derivatives policy** The sub-fund may use financial instruments ("derivatives") whose value depends on the future prices of other assets. Derivatives are usually used to hedge risk and/or to manage the sub-fund more efficiently.

**Intended retail investor** This product is suitable for investors seeking income and long-term growth through capital appreciation. Notwithstanding the above, any investment in this product should only be made after the long term financial objectives and requirements of the investor and the risks associated as set out in Appendix 1 of the prospectus have been duly considered.

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

Other risks that are materially relevant to the product but are not included in the synthetic risk indicator:

**Credit risk:** Risk that a bond will lose all its value if the issuer of the bond is unable to repay its debt on the due date.

**Liquidity risk:** Some financial securities may be impossible to sell quickly at a given instant or may have to be sold at a discount during periods of market stress.

**Counterparty risk:** The sub-fund can lose money as a result of the failure of a market player with which it does business.

**Operational risk:** In any market, and in particular in emerging markets, the sub-fund may lose some or all of its money in the event of default in the custody of assets, fraud, corruption, political measures or any other adverse event.

**Concentration risk:** Where the sub-fund concentrates its investments on one country (or one region or sector) that is affected by an adverse event, its value may fall.

**Management risk:** Under abnormal market conditions, standard management techniques may be ineffective or unfavourable.

**Derivatives risk:** Some derivatives may increase the volatility of the sub-fund or expose the sub-fund to losses higher than the price of these derivatives.

**Sustainability risk:** environmental and/or social aspects are not systematically part of the fund's investment selection process. This may result in the fund being more exposed to companies that have a negative impact on sustainability.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

## Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 12 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period	7.0		
Example Investment Scenarios	EUR 10 000	If you exit after 1 Year	If you exit after 7 Years
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>

<b>Moderate</b>	<b>What you might get back after costs</b>	<b>10 670 EUR</b>	<b>16 240 EUR</b>
	Average return each year	6.73%	7.17%
<b>Favourable</b>	<b>What you might get back after costs</b>	<b>16 780 EUR</b>	<b>20 930 EUR</b>
	Average return each year	67.83%	11.13%

**Unfavourable Scenario:** This type of scenario occurred for an investment between 12/2021 and 12/2024.

**Moderate Scenario:** This type of scenario occurred for an investment between 11/2016 and 11/2023.

**Favourable Scenario:** This type of scenario occurred for an investment between 10/2014 and 10/2021.

The before-mentioned calculations were performed using benchmark ONE1797-LISTED PARTICIPATIONS (Composite Benchmark)

### What happens if CADELUX S.A. is unable to pay out?

The assets of the sub-fund are held in custody by its custodian, namely Delen Private Bank Luxembourg (the 'Depositary'). Any insolvency of the Priip manufacturer will not affect the assets of the sub-fund held by the Custodian. In the event of the insolvency of the Depositary or anyone acting on behalf of the Depositary, the sub-fund may suffer a financial loss. However, this risk is mitigated to a certain extent because the Custodian is legally required to keep its own assets separate from those of the sub-fund. The Depositary is also liable to the sub-fund and investors in respect of any losses resulting from, among other things, negligence and fraud or the Depositary's willful breach of its obligations (subject to certain limitations). A loss is not covered by an investor compensation or guarantee scheme.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment EUR 10 000		
Scenarios	If you exit after 1 Year	If you exit after 7 Years
<b>Total Costs</b>	329 EUR	2 215 EUR
<b>Annual costs impact (*)</b>	3.3%	2.6% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.82% before costs and 7.17% after costs.

To cover any transaction costs which may arise from the conversion, the directors may charge, a conversion fee of up to the amount of the redemption charge applicable to the shares to be converted. In addition, the subscription charge of the class or Fund in which the conversion is effected may be levied as if the investor were subscribing in that class or Fund.

### Composition of costs

One-off costs upon entry or exit	If you exit after 1 year	
<b>Entry costs</b>	0.0%, we do not charge an entry fee.	<b>Up to 0 EUR</b>
<b>Exit costs</b>	Maximum 1.0%, No exit costs may be charged, either to the Fund or by the distributor.	<b>Up to 100 EUR</b>
Ongoing costs taken each year		
<b>Management fee and other administrative or operating costs</b>	2.1% of the value of your investment per year. This is an estimate based on actual costs over the last year.	<b>214 EUR</b>
<b>Transaction costs</b>	0.2% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	<b>16 EUR</b>
Incidental costs taken under specific conditions		
<b>Performance fees</b>	0.0%. There is no performance fee for this product.	<b>0 EUR</b>

Different costs apply depending on the amount invested. These figures include the maximum trading commission that the seller of the product can charge you (0.0% of the amount invested on entry and 1.0% of the value on exit). The seller will provide you with information on the actual distribution costs.

**How long should I hold it and can I take my money out early?****Recommended holding period: 7 Years**

This product has no minimum (or maximum) duration but aims to invest for the medium and long term while keeping the money readily available. Due to the underlying investments, which fluctuate with the fluctuations of the financial markets, it is recommended that you hold your investment for at least 7 Years. You can get on or off at any time (on working days). The value is calculated on the first valuation date following receipt of the redemption request. In addition, you must also take into account your personal and tax situation in the event of a sale. Charges may also be deducted depending on the sale, which may affect the return on the investment.
