You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type This product is a non-UCITS investment fund. It is a Limited Liquidity Qualifying Investor Alternative Investment Fund. The minimum initial subscription and subsequent subscription amounts are set at €100,000. The product's return depends on the performance of the underlying assets. Some or all of your capital is at risk in respect of this product.

Objectives

Product objectives The Fund aims to achieve long term growth on your investment.

Investment approach The fund will construct a portfolio mainly consisting of commercial properties primarily in Ireland.

Investment policy The Property in which the Fund invests will be focused primarily on Property situated in Ireland and may include Property situated outside Ireland. It is anticipated that the Property and the underlying investments of the Property Related Assets may include but will not be limited to the investment and development of property in the commercial/office, industrial, logistics and retail sectors and other such real estate opportunities that may from time to time assist the Fund in potentially generating capital appreciation, income or diversification. The fund may utilise borrowings to fund property acquisitions.

Benchmark The fund has no benchmark.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 Years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Redemption policy Redemptions are as follows: 180 days prior to the last Business Day of March, June, September and December or such other day or days as may be determined by the Directors and notified to Shareholders in advance, provided always that there will be at least one Dealing Day per calendar quarter.

Distribution policy Dividends may be declared and paid out of net profits of the Fund upon the approval of the Directors.

Sustainability policy The manager integrates sustainability risk management throughout the investment lifecycle however, the fund does not pursue a sustainability mandate. For further information, please see www.greshamhouse.ie.

SFDR Article 6

Derivatives policy The fund may utilise derivatives for efficient portfolio management.

Intended retail investor The fund will target Irish qualifying investors.

Term This product is open ended. However, the Manufacturer reserves the right to close the Fund should assets fall below €20,000,000.

Practical information

Depository Société Générale Dublin Branch S.A

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity to pay you.

See prospectus for full suite of applicable risks

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period	5.0	
Example Investment	EUR 100 000	
Scenarios	If you exit after 5 Years	
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs	80 240 EUR
	Average return each year	-4.31%
Unfavourable	What you might get back after costs	138 600 EUR
	Average return each year	6.75%
Moderate	What you might get back after costs	163 500 EUR
	Average return each year	10.33%
Favourable	What you might get back after costs	189 980 EUR
	Average return each year	13.69%

The above calculations were executed using a Monte Carlo simulation based on the expected cash flows of the fund and their related IRR. This table shows various potential illustrative return scenarios that could be achieved at the 5-year anniversary for a commitment of €100,000. It should be noted the €100,000 commitment is for illustrative purposes only to allow comparisons between different products. None of the scenarios is an exact indicator; what you get will vary depending on how the underlying investment performs.

What happens if Gresham House Asset Management Ireland Limited is unable to pay out?

You may face a financial loss should the Manufacturer or Depositary, default on their obligations. There is a compensation fund available for investors under the Investor Compensation Act, 1998 (the "Act") where the criteria for payment of compensation under the Act have been fulfilled. Further details are available from the Manufacturer.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 100 000 is invested.

Investment EUR 100 000	
Scenarios	If you exit after 5 Years
Total Costs	21 400 EUR
Annual costs impact (*)	4.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 15.37% before costs and 10.33% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Anti Dilution Levy on subscription - 9%	9000 EUR
Exit costs	An anti-dilution levy of 1.5% of the NAV may be charged at the direction of the Directors.	1 500 EUR
Ongoing costs taken each year		
Management fee and other administrative or operating costs	The manager levies an annual management fee (of 2.4%) for managing and servicing your investments	2 365 EUR
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0 EUR
Incidental costs taken under specific conditions		
Performance fees	We do not charge a performance fee.	0 EUR

How long should I hold it and can I take my money out early?

Recommended holding period: 5 Years

This product has a 2-year lock-up period and is designed for long term investment; you should be prepared to stay invested for at least 5 years. The first opportunity that Shareholders will have to receive proceeds for the repurchase of their Shares will be following the expiry of the Lock-Up Period, subject to a 12 month notice period.

How can I complain?
