RISK AND REWARD PROFILE

The indicator above illustrates the position of this Fund on a standard risk/reward category scale. Please note that:

- the risk reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund;
- the risk category shown is not guaranteed and may shift over time; and
- even the lowest category does not mean your investment is 'risk free'.

The following risks are not adequately captured by the indicator:

- Operational Risk. The Fund is exposed to the potential for loss caused by a deficiency in information, communications, transaction, processing and settlement, and accounting systems. The main risk is that third parties may fail to ensure that statutory requirements are met.
- Emerging Market Risk. There are specific risks associated with investments in emerging markets, including political, settlement, credit, liquidity, currency, accounting standards, legal/regulatory and custodial/registration risk.
- Equity Risk. The Fund invests in equities and the value of these equities may go down as well as up. Investors may not get back the original amount invested.
- Counterparty Risk. The counterparty could become unable to honour its commitments to the Fund, creating losses for the Fund.
- Commodity Risk. The Fund seeks indirect access to commodities. The value of commodities can be volatile and is affected by a wide range of factors including market movements, supply and demand imbalances and inflationary trends.
- Currency Risk. The Fund will be exposed to different currencies and changes in foreign exchange rates could create losses.
- Derivatives Risk. A derivative may not perform as expected and may create losses greater than the cost of the derivative.

Please see the section entitled Risk Factors of the Prospectus where full details of all of the risks of the Fund are disclosed
