What is this product?

Type

This is an investment fund established as an Irish Collective Asset-Management Vehicle (ICAV).

Objectives

Investment objective The Fund aims to participate in the long-term total return of Global Equity Markets. Its performance target is to outperform the MSCI World Index (the 'Benchmark') after deducting charges, over rolling five-year periods. The Fund will seek to achieve this objective by predominantly investing in the shares of companies that are listed on Regulated Markets.

Investment policies The Fund will invest at least 90% of its Net Asset Value in the shares of companies globally, both in Developed Markets and Emerging Markets.

There are no restrictions on the Fund in terms of sector and market capitalisation. However, the Fund's country and sector weights, including its investment in Emerging Markets, will generally align with those of the Benchmark. The Fund may allocate up to 20% of its Net Asset Value to Emerging Markets.

The Fund may also invest up to 10% in other investment funds, known as collective investment schemes, including funds managed by the Investment Manager, the Manager or the ICAV.

A limited amount of assets (around 10% or less) may be held in cash for efficient portfolio management purposes and to manage the flow of investors' money in and out of the Fund.

The Fund's investment strategy is based on the corporate life cycle, classifying companies into five stages: Accelerating, Compounding, Fading, Mature, and Turnaround. It targets undervalued companies with strong potential for long-term shareholder wealth creation. The process combines quantitative screening (financial metrics like cash flow, margins, growth, and return on capital) and qualitative analysis to narrow over 5,000 companies down to around 300 for intrinsic value assessment, with the most attractively priced selected for investment.

This Fund is subject to the disclosure requirements of Article 6 of Regulation (EU) 2019/2088.

The Fund may use financial derivative instruments for efficient portfolio management and hedging purposes only. Investors should refer to "Financial Derivative Instruments and Efficient Portfolio Management" in the Fund's Supplement. In particular, the Fund may use spot and currency forward contracts to hedge non-base currency positions in the Fund back to the base currency to reduce currency risk. Index futures may also be used for the purpose of efficient portfolio management.

Benchmark The Fund does not intend to track the Benchmark, and investors should note that the Benchmark is being used by the Fund for

performance comparison purposes only. While the Fund may invest in investments which are constituents of the Benchmark, the Fund will be actively managed, and its portfolio will not be constrained by reference to any index. The Investment Manager may use its discretion to invest in instruments which are not included in the Benchmark. The Fund will usually be invested in a concentrated portfolio of 25-45 holdings.

SFDR Article 6.

Redemption and Dealing You can buy or sell shares on demand every Business Day in Ireland, London, United Kingdom and United States of America subject to the terms set out in the section entitled Key Information for Purchasing and Repurchasing of the Fund's Supplement (which together with the prospectus constitutes the Prospectus).

Distribution policy Shares in this share class are accumulating, voting shares. Accordingly, income and capital gains arising in respect of the share class will be re-invested and reflected in the Net Asset Value per Share of the Share Class.

Launch date The fund was launched on 2025-01-23. This C Share Class GBP (Unhedged) - Accumulating was launched on 2025-01-23.

Fund Currency The base currency of the Fund is USD. This Share class is in GBP.

Conversion of units/shares You may be able to convert some or all of your shares into other shares, subject to your eligibility and by giving prior notification. More specific information about the other share classes of the Fund is available in the Prospectus. Information on the specific classes available for sale in your particular jurisdiction/residence is available from your financial advisor.

Asset segregation An ICAV is an umbrella open-ended investment vehicle with variable capital and segregated liability between its sub-funds. This means that investors have no claims over the assets of a sub-fund in which they do not own shares. This document describes a share class of a sub-fund of the ICAV and the Prospectus and periodic reports are prepared for the entire ICAV. A Supplement is prepared for each sub-fund.

Intended retail investor The Fund is suitable for investors with an investment horizon of at least 5 years that seek capital growth via exposure to global equity and equity-related securities and who are willing to accept shorter-term fluctuations in price typically associated with such investments.

Term The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIP Manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

- GBP 10 000 is invested.

| Example Investment 10 000 GBP | | |
|-------------------------------|--------------------------|---|
| Scenarios | If you exit after 1 Year | If you exit after 5 years (recommended holding period) |
| Total Costs | 72 GBP | 450 GBP |
| Annual Cost impact (*) | 0.7% | 0.8% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.1 % before costs and 9.3 % after costs.

Composition of costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|--|--|--------------------------|
| Entry costs | 0.0%, we do not charge an entry fee. | 0 GBP |
